CONGRATS!

Andy Smith has achieved the VMware Certified Professional designation.

Shawn Rasmussen and Patrick Fagen have achieved the MCSE (Microsoft Certified Systems Engineer) credential.

IT Outsourcing and Managed Network Services Can Help Reduce Operational Costs

NetWorks, Inc. can help you maximize your IT investments. Our Managed Services solutions allow for diligent monitoring, alerting, management and maintenance of your network 24/7. Our solutions may free you from “firefighting” so that you can focus on using technology to improve your company’s business processes.

Because of the rapid changes in technology, IT has to continuously adapt to an evolving business environment. Companies are choosing to selectively or fully outsource their network services for a variety of reasons.

- Reduce operational costs with a reduced technology footprint
- Frees up capital and human resources so your company can focus more on core competencies
- Increases employee productivity and helps your company operate more efficiently
- Security and backup peace of mind
- Single point of contact for all your IT needs

Let NetWorks, Inc. customize a Managed Services package that provides growth, flexibility, and support in areas that deliver optimum benefits to your bottom line. For a fixed monthly fee, we can end your frustration from managing your own IT services. Managed Services will save you time, effort and money.

- Network Troubleshooting / Management
- Data Backup
- Help Desk Support
- Network Security
- Project Management
- Remote Monitoring
- Network Design

ESET NOD32 Antivirus Solutions

ESET NOD32 Antivirus Version 3.0 Business Edition is a highly effective security solution designed to protect business computers from a wide range of malware and other threats. Using advanced ThreatSense technology, ESET NOD32 Antivirus detects future threats proactively, minimizing the window of vulnerability left open by traditional signature-based detection. It's low resource utilization and small footprint make it very efficient, even on older hardware, yet it supports the latest operating systems and 64-bit processors. ESET NOD32 Antivirus detects and disables viruses, Trojans, worms, spyware, adware, phishing attacks, rootkits and other Internet threats that may pose a security or financial threat to businesses. Its comprehensive and proactive protection is unrivaled, yet it also has a very small system footprint—improving performance and conserving bandwidth.

The included ESET Remote Administrator provides centralized deployment and management, and scales easily from small offices to enterprise-sized networks.

NetWorks, Inc. is an authorized reseller for ESET Software. This is the product to consider if you want to improve performance with a small system footprint. Contact our sales team to see if ESET NOD32 is the right solution for you.

Today 15,000 new viruses will be created to steal or damage your data.

Adobe Creative Suite 4 Introductory Offer—Save up to \$200

For a limited time, upgrade from an earlier qualifying version of Creative Suite® software or Macromedia® Studio software for the same price as an upgrade from Creative Suite 3. **Hurry** – introductory price ends on February 28, 2009. Offer valid direct from the Adobe Store to customers in North America only. Reseller prices may vary. Offer does not apply to OEM or volume licensing customers.

Qualifying Versions:

- Adobe Creative Suite 2.x Premium or Standard
- Adobe Creative Suite 1.0 Premium or Standard
- Macromedia Studio 8 or MX 2004
- Adobe Production Studio 1.0 Premium or Standard

Upgrade pricing is available if you have one of the qualifying previous products listed above and can provide the serial number for that product during installation. When purchasing an upgrade, be careful to choose one you qualify for because the installer will not work without the serial number from an eligible earlier version.

NetWorks, Inc. Overstock Deals

You can find incredible deals on our overstock, quality returns and used product. We are offering these deals to help reduce our inventory.

Our sale list includes a wide variety of products like cables, hard drives, switches, toner cartridges, memory and more. For a complete list, visit our website at www.networks-inc.com and click on Overstock in the menu bar.

CRNtech Products of the Year

CRNtech's December 2008 Cover Story was "Products of the Year". Here is a quick summary of their article.

Think of 2008 as the year of the milestone. There were milestones reached in processing performance, operating system performance and functionality. Notebooks pushed the envelope on smaller form factors and battery life, and desktops made a strong comeback from a performance, function and design perspective.

More of IT now scales from the browser to the data center than ever before, and technology providers managed to make cost, return on investment and manageability critical.

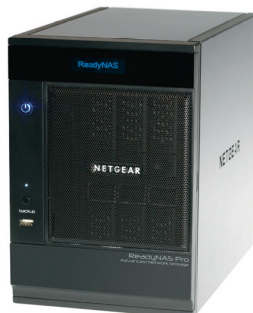

The Test Center evaluated hundreds of products in 2008, from the palmtop to the data center and everything in between. In selecting each product of the year, Test Center editors needed to make sure that there was a critical offering to the market at large, significant value to the end user and immediate impact on how the lion's share of solution providers in the channel would think about and deliver technology.

Category	Winner
Wireless	Ruckus ZoneFlex 7942
Desktop	Dell Vostro 220
Notebook	Lenovo ThinkPad X300
Operating System	Microsoft Windows Server 2008
Open Source	Ubuntu 8.10
Web Application	Firefox 3.0
Desktop Application	IBM Lotus Symphony
Virtualization	Microsoft Hyper-V
CPU	Intel Nehalem
Security Appliance	Sophos WS1000
Storage	Netgear ReadyNAS Pro
Smartphone	iPhone 3G
Antispam	MX Logic Email Defense Service

"Netgear's ReadyNAS desktop NAS appliances have always been standard setters in the field of network storage but its latest Pro Business Edition raises the bar into the stratosphere. In this exclusive review we bring you the low-down not only on the first six-drive desktop appliance to market but one that is so fast it leaves everything else in the dust."

PCPro Product Review
November 2008

Netgear ReadyNAS Pro

CRNtech Products of the Year

PRODUCT SPOTLIGHT

Netgear ReadyNAS Pro is the newest and most powerful member of the award-winning ReadyNAS product family. Designed for small and medium businesses, workgroups and home offices, ReadyNAS Pro delivers class-leading performance, ease of use, and robust features in a desktop small form factor chassis supporting 6 SATA channels and up to 6 TB of storage. This 6-bay gigabit network attached storage (NAS) appliance is packed with high-end server features, including RAID (redundant array of independent disks) levels 0, 1, 5, 6, and Auto-Expandable X-RAID2 support for data protection against disk failure, system monitoring capabilities and built-in backup. To ensure high availability to stored data, the ReadyNAS Pro features dual redundant Gigabit Ethernet ports for failover protection.

For over ten years, Netgear has been delivering a continuous stream of innovative networking products that deliver style, ease-of-use, value, performance, security, and reliability. From wireless routers and adapters to Layer 3 Managed Switches, Netgear has the networking equipment you need for your home or small business.

NetWorks, Inc. highly recommends the Netgear ReadyNAS Pro as well as many other Netgear products. They consistently offer valuable solutions within reach of even the smallest IT budgets. Contact our sales team for more information at 515-221-1290 or email sales@networks-inc.com.

Cisco Certified Refurbished Equipment

Cisco Certified Refurbished Equipment is a price competitive and trusted alternative when buying new Cisco equipment is not an option. The Cisco Certified Refurbished Equipment is ideal for customers faced with tight or limited capital spending budgets, "lowest price option" procurement policy, maintenance and extension of legacy networks, and immediate network equipment delivery. Quantities are limited and are sold through a first come, first served basis through Cisco registered resellers.

Program Highlights

- Comprehensive inventory of current and end-of-sale switches, routers, wireless, security, telephony and other products
- Refurbished, upgraded, tested and inspected to meet Cisco specifications
- Loaded with a licensed, shippable release of the Cisco IOS Software to ensure network compatibility
- Backed by the same Cisco warranty and service program options as the new product
- Technical support available through the same Cisco Technical Assistance Center as new product
- Pricing offered at 25 to 30% discount relative to equivalent new product prices

Cisco updates their inventory list daily.

SMARTnet support contracts can be purchased for additional coverage.

Cisco Certified Refurbished Equipment

Benefits of Cisco Certified Refurbished Equipment

- Have confidence in your network. All products are certified and refurbished to Cisco specifications, supported and warranted same as new product.
- Protect your budget. Competitive pricing, no hidden costs, and financing available to overcome your budget constraints.
- Protect and maintain your network. Support your legacy network needs from our comprehensive inventory of current and discontinued Cisco products.
- Protect your business. Same-as-new warranty protection plus hardware and software support options for 24-hour support enable you to focus on your business, not your network.

NetWorks, Inc. has sold and supported Cisco refurbished products for many years. With the current economy, refurbished product is a practical alternative to consider when dealing with budget constraints.

About Us

NetWorks, Inc. is a value-added reseller and systems integrator that designs, deploys, and support small, medium and large corporate networks. We started as a system integrator company in 1994, but have grown to offer advanced service and procurement solutions. We strive to find the best ways to support the goals and strategies of every client...no matter if your business is large or small, local or national.

Over the years, NetWorks, Inc. has implemented complete network solutions that grow as our clients prosper. These long-term partnerships are what our clients have depended on since 1994. Whether you have qualified IT personnel on staff or you choose a custom service package from NetWorks, Inc., we can deliver the service that suits the way you work.

Our team is good at asking questions. It's the way we learn about the unique challenges your company faces. And because we serve a diverse group of businesses, we have experience enough to know it is rare that two companies require exactly the same solution. Our technical resources, experience, and creativity are unmatched.

Why not put us to work finding a solution for you? Let our experienced team help you solve your IT problems. We are locally owned and operated.
