Complete Network Solutions

NetWorks, Inc. brings together data and voice to maximize business communications.

Our engineer staff has 25+ years of industry experience. Our sales and support staff has 20 years of experience. Together we offer a complete set of skills to meet the diverse needs of our clients.

Symantec AntiVirus is now Symantec Endpoint Protection 11.0

Symantec™ has consolidated and expanded its Endpoint Security offerings. Symantec Endpoint Protection 11.0 combines Symantec AntiVirus™ with advanced threat prevention in a single agent, delivering unparalleled defense against malware for laptops, desktops and servers.

Combining Symantec antivirus and antispymware technologies with desktop firewall, intrusion prevention, and device control, the solution offers robust protection against both known and unknown threats such as zero-day attacks. Symantec Network Access Control 11.0 operates under the same management console, for advanced, multilayered endpoint protection that saves your customers time and money.

Symantec Endpoint Protection gives customers control over laptops, desktops and servers that connect to their networks, reducing the cost and complexity of security management against established and evolving threats—even insider threats.

The Customer Case for Endpoint Security

Most customers already use some form of antivirus product. Antivirus solutions from Symantec include a disciplined program of new content—Symantec LiveUpdate™—to keep managed endpoints defended against newly identified viruses and worms. But today's threat environment calls for even more—and Symantec is ready, with even stronger protection for customer endpoints.

Faster, more powerful threats evolve constantly, raising risks that a new worm or virus will compromise networks before it can be analyzed and blocked. And unmanaged, out-of-compliance endpoints present risks of unknown proportions, regardless of the defenses at network perimeters.

For comprehensive protection in today's threat environment, Endpoint Security gives your customers:

- Technology that anticipate threats, not just react to them
- A unified solution, with a consistent framework and definitions
- Technology that keeps pace with both existing and emerging threats, including zero-day attacks
- Employee protection against identity theft and "phishing" fraud
- Full-spectrum security and device control in a single solution
- Layered endpoint protection extended to remote offices
- Access controls that enforce security policy across a broad range of network infrastructures
- Security policy settings customizable by user and location

Simplified, centralized management is crucial: complex management means errors and delays that compromise a company's security architecture. Collections of point products tie your customers up trying to scale, maintain, patch, and upgrade individual tools that overlap one another or leave gaps.

For more information, go to www.symantec.com/endpointsecurity or call us at 515-221-1290.

Promotion Expires: December 14, 2007

FREE Business Ethernet Switch with BCM

Purchase a new Business Communications Manager (BCM) 50, 200 or 400 and receive a free Business Ethernet Switch.

The Nortel Business Ethernet Switch portfolio provides the building blocks for creating a data information infrastructure that supports the communications requirements of small to medium sized businesses. Through a purpose-built hardware design and software feature-set, the Business Ethernet Switch portfolio allows users of all technical levels to quickly and easily integrate these products into new or existing IT infrastructures.

The Nortel Business Communications Manager (BCM) portfolio delivers small to medium-sized businesses and branch offices an award winning converged voice and data solution, providing a choice of IP-enabled or pure-IP strategy. Business Communications Manager offers the features businesses of all sizes require like telephony, unified messaging, multimedia call center, interactive voice response, IP routing and data services such as firewall, wireless, and more.

New! RSA SecurID Appliance 100

The RSA SecurID Appliance 100 provides the industry's leading two factor user authentication solution, enabling secure remote network access for up to 100 users, in a plug and play format.

Aimed at businesses with up to 500 employees, the Appliance 100 is designed to be:

- **Simple** — Installed in seven easy steps
- **Scalable** — Capacity for up to 100 users
- **Flexible** — Compatible with Industry leading access solutions including Juniper, F5, Citrix, Check Point, Cisco and Microsoft
- **Cost-effective** — Competitively priced and low total cost of ownership

The RSA SecurID Appliance 100 is engineered to enable secure remote network access for up to 100 users through RSA SecurID two-factor authentication technology, which is based on something you know, such as a password or PIN, in combination with something you physically have, such as an authentication token. SecurID technology is used by thousands of corporations and millions of users to protect access to IP/Sec and SSL VPNs, wireless networks, web servers, business applications and more.

Microsoft Partner Subsidy Promotions

Don't leave money on the table. Take advantage of Microsoft's current offerings at www.microsoftincentives.com.

1. Contact your partner—NetWorks, Inc.
2. Purchase a qualifying license. Several promotions to choose from.
3. Redeem subsidy dollars. When you redeem the offer, Microsoft will send you a check made out to the qualifying partner of your choice. Partner subsidy dollars can be spent on any combination of hardware, software and services.

For example, now until December 31, 2007, Microsoft is offering partner subsidy dollars worth up to \$10,000 to customers purchasing between one and twenty-five Windows Server 2003 R2 Open licenses that include Software Assurance. This is just one of many promotions being offered. Go to www.microsoftincentives.com for more details.

Trivia Question

Who said 'I think there is a world market for maybe five computers'?

- Andy Grove
- Bill Hewlett
- John Mauchly
- Thomas Watson

Now Available!

FortiAnalyzer-800B is the newest extension to the FortiAnalyzer product family. It features 4 removable 500GB disk drives for up to 2TB of storage capacity in a one rack unit form-factor. This new model is RoHS-compliant and offers improved performance over the previous FortiAnalyzer-800 model.

Answer: Thomas Watson

Watson was chairman of IBM, and said it in 1943.

About Us

NetWorks, Inc. is a leading provider of computer networking and hardware procurement services for the Des Moines metropolitan area as well as for other areas of the Midwest. Our experienced staff can help you with any of your company's information processing needs. We specialize in local and wide area networking with extensive experience working with Novell and Microsoft. NetWorks, Inc. was founded in 1994 and has a staff of certified systems engineers that are available 24 hours a day. We value our client relationships and are dedicated to providing complete network solutions.

NetWorks, Inc. works with IT professionals to help support technology solutions that are critical to your organization's success. Our team is good at asking questions. It's the way we learn about the unique challenges your company faces. And because we serve a diverse group of businesses, we have experience enough to know it is rare that two companies require exactly the same solution. Our technical resources, experience, and creativity are unmatched.

Why not put us to work finding a solution for you? Let our experienced team help you solve your IT problems. We are locally owned and operated.
